

FROM OPEN RANGE TO THE COOKING RANGE
WILD HORSES GOING TO SLAUGHTER SALES

Senator Conrad Burns and certain other legislators have asserted their position that requiring the BLM to sell wild horses, most probably to slaughter buyers, is the best thing for them. Here is what they have in mind.

From open range to the cooking range.

These icons of the great pioneering spirit of the old west have been rounded up. They will be sold in bulk "without limitation" where many will be crammed into livestock transports and hauled to the slaughter plants.

Right hand image: Horses that died in transport.

This is how our government plans to treat our wild horses.

AT THE SLAUGHTERHOUSE

This life is over.

Try again. She isn't dead yet.

Giving up the struggle.

The Wild Free-Roaming Horses and Burros Act was unanimously passed by Congress in 1971 after demands by the American public for the protection of these animals. Senator Conrad Burns sneaked in a secret rider to the 2005 spending bill that annulled much of the Act and requires the wholesale disposal of these animals. Your representatives in Congress have yet to repeal this atrocity and answer to the will of the American people. **WHY?**
